KUHN BALER TWINES THE PERFECT FIT FOR KUHN BALERS

be strong, **be KUHN**

KUHN BALER TWINES

THERE IS A GOOD REASON ...

KUHN balers are engineered to provide highest economy and efficiency. To full exploit the potential of your baler, KUHN Twines are the best choice.

Constant quality, optimized characteristics and tailor made specifications adopted to the knotter system, ensure troublefree and satisfying results.

YOUR FREEDOM OF CHOICE FOR BEST RESULTS

KUHN 110 HD BLUE

The very high knotting strength – combined with very high tearing strength, top compactness and optimum elongation will tap the full potential of your baler. Using this twine and utilizing the maximum compression power of your baler you'll achieve more bale weight depending on conditions, up to 15%.

KUHN 110 HD blue offers you:

- high suppleness
- very high knotting strength
- extremely high tearing strength
- increased resistance to mechanical damage
- improved compactness
- more reserves for bale handling
- enormous bale density- high running constancy due to improved evenness

KUHN 130 VIOLET

This twine is the reliable and versatile partner for you. For any KUHN Baler suitable and used by professionals. Reliable and strong. The twine which makes your baler better.

KUHN 130 violet offers you:

- very good tearing strength
- ideal knotting capacity
- excellent cutting behaviour
- high bale density
- high compactness

KUHN 150 VIOLET

KUHN 150 violet is equal in structure to the type KUHN 130 violet, but offers higher runnage. Just as universally applicable, this twine offers good reserves in the conventional pressure range as well as trouble-free processing. Our customers like to use this type for bales pressed at normal pressure for less expansive pressed material such as silage, hay and lucerne.

KUHN 150 violet offers you:

- high tearing strength
- very good knotting capacity
- high operating efficiency
- good compressed density
- reduced strain on knotter
- high compactness

KUHN 750 BLUE

Reliable, tight and regular bales, that's what you'll get with KUHN750 blue. The tearing strength values as well as the structure of the twine ensure the compactness and adhesion you need to avoid nasty surprises during pressing and loading.

KUHN 750 blue offers you:

- very good tearing strength
- top bale adhesion
- perfect bale shape
- maximum bale density
- operating efficiency
- high running constancy due to improved evenness
